

COMPLAINTS

Aim

To develop a simple **Complaint Management System** using **Zoho Creator** to demonstrate the **Software as a Service (SaaS)** model, allowing users to submit and track complaints through a cloud-based application.

Procedure

1. Log in to Zoho Creator and create a new application named **Complaint Management System**.
2. Create a form and add the required fields such as Contact Information, Complaint Details, Product/Service, Complaint Description, Image Upload, and Suggested Solution.
3. Configure field properties and create basic workflows for complaint submission and status tracking.
4. Save the form, enter sample complaint records, and verify the generated reports.
5. Publish the application to demonstrate cloud-based access using the **SaaS** model.
